

FREE FLOAT® DRAIN TRAP

MODEL SS1VG

FREE FLOAT DRAIN TRAP WITH TIGHT SHUT-OFF FOR AIR AND INERT GAS SERVICE

Features

All stainless steel trap to be installed in pipe ends. Automatically drains condensate from air and inert gas systems.

- Constant water seal and unique rotational seating design eliminate concentrated wear to ensure long life.
- 2. Three-point seating provides a tight seal even under no-load conditions (with rubber orifice).
- 3. Precision ground float ensures superior sealing.
- 4. Built-in screen with large surface area ensures extended trouble-free operation.
- Self-modulating free float provides continuous, smooth, low velocity condensate discharge as process loads vary.

Specifications

Model		SS1VG-R (Rubber Orifice)	SS1VG-M (Metal Orifice)				
Connection		Screwed, Socket Welded, Flanged					
Size (mm)		15, 20, 25					
Orifice No.		10	G5, G10, G16, G21				
Maximum Operating Pressure (MPaG)	PMO**	1.0	0.5, 1.0, 1.6, 2.1				
Maximum Differential Pressure (MPa)	Δ PMX**	1.0	0.5, 1.0, 1.6, 2.1				
Minimum Operating Pressure (MPaG)		0.01	0.01				
Maximum Operating Temperature (°C)	TMO	150	220				
Minimum Condensate Load for Tight Seal	ing (kg/h)	0 0.5					
Applicable Fluids		Air, Inert Gases*					

^{*} Do not use for toxic, flammable or otherwise hazardous fluids.

2.10

PRESSURE SHELL DESIGN CONDITIONS (NOT OPERATING CONDITIONS): Maximum Allowable Pressure (MPaG) PMA: 2.1

Maximum Allowable Temperature (°C) TMA: 220

1.64

^{**} For specific gravities other than 1.00 use table below

Other standards available, but length and weight may vary * Weight is for Class 300 RF

NOTE:

Install the shortest possible vertical condensate pipe to the trap to ensure unobstructed condensate flow.

Discharge Capacity

Capacity Conversion Factors

Specific gravity	0.95	0.9	0.85	0.8	0.75	0.7	0.65	0.6	0.55	0.5
Conversion Factor	1.03	1.06	1.08	1.12	1.16	1.19	1.24	1.29	1.35	1.41

Before using the capacity chart multiply the required capacity (including safety factor) by the appropriate conversion factor for the specific gravity of the liquid. Choose from the table above or use the following formula: conversion factor = $\frac{1}{\sqrt{S.G.}}$

- 1. Line numbers within the graph refer to orifice numbers. Orifice numbers beginning with "G" are for SS1VG-M (metal orifice); other numbers are for SS1VG-R (rubber orifice).
- 2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
- 3. The chart is applicable to condensate below 100 °C.
- 4. The discharge capacity is for a liquid with specific gravity of 1.
- 5. Recommended safety factor: at least 1.5.

DO NOT use traps under conditions that exceed maximum differential pressure, as condensate backup will occur!
